Software Development

Code It has developed a number of products and MIS applications for its clients in this service. Our mature software development processes, combined with excellent infrastructure have significantly increased the "on-time and on-budget" delivery of software in the offshore mode.. Our services begin from analysis, moving through designing, development, testing and implementation to maintenance. Our applications come in all sizes, be it a one-table database, or a massive client-server application. The creation of complete database applications is yet another field that we specialize in.

01

Interactive web based application

Interactive Application Development (iAD) is about harmonizing art with technology

02

Desktop Applications

Server database applications, POS Systems, Sales management
